DEPRAG
Your worldwide partner for Screwdriving Technology and Automation

Please find more information about our Intelligent Manual Work Stations at:

THE INTELLIGENT MANUAL WORK STATION

Tuned Components guaranteed
- Process Reliability
- Flexibility
- Technical Cleanliness
- Ergonomic
- ESD-Capable
- Cost Efficient
Intelligent Process Control and Process Documentation

- Highest Accuracy through the established EC Technology
- Automatic adjustment of your screwdriving parameters based upon position control
- Technical Cleanliness through vacuum extraction, low agitation feeding techniques and special process parameters
- Monitoring and control of part counts, screw positions and screw insertion sequences

Individual Components tuned as a System

ESD-Capable Cost Effective

Optimized Operator Guidance through Process Visualization

Operator Comfort through optimised Support Modules

Ergonomically proven Workplace Accessories

Targeted Dissipation of Electrostatic Charge

Individual Components tuned as a System

Standard Solutions

Avoid Abrasion

Reduce Abrasion

Remove Abrasion

The Intelligent Manual Work Station

Flexibility

Product Identification and Process Mapping

Designate the Screw Position and the Screw Assembly Sequence

Mapping, Visualization, Monitoring

Screwdriving Parameters automatically adjusted

Automation building modules tuned as a system FROM ONE SOURCE!
