

Handheld Screwdriver electric

MINIMAT-EC-Servo Screwdriver handheld

straight handle design - torque ranges between 0.01 - 2.0 Nm

The flexible EC-Servo screwdriver for low torque applications

- sensor controlled
- flexible
- data recording
- highly accurate
- ESD-capable

The EC-Servo screwdriver with highly dynamic drive technology combined with the AST5-S series controller offers maximum flexibility and control. The integrated torque and angle measurement system enables precise control of the screw assembly process and guarantees the highest accuracy and reliable documentation of process parameters. Through the combination of different screwdriving strategies with flexible tightening parameters, multi-step screw run-down sequences can be realized in one assembly cycle.

DEPRAG EC-SERVO SCREWDRIVER – flexible for the highest standards

The DEPRAG EC-Servo screwdrivers with matched AST5-S programmable sequence controllers allow unrestricted programming of the screw tightening process. Within the power range of the selected tool; the torque, speed, stand-by time and direction of rotation can be adjusted individually to the assembly requirement. The outstanding features of handheld EC-Servo screwdrivers are torque precision and flexible range of control functions – perfect conditions for process reliability and precise control.

The permanent magnet DC electric motors ensure low maintenance operation. They are ideally suited for screwdriving applications due to their outstanding dynamics and an wide achievable torque values. The integrated torque transducer as well as angle measurement, allows precise control of multistage screwdriving processes and documentation of the resulting values. Torque accuracies of < 1% standard deviation and thus Cmk values of ≥ 1.67 with a tolerance of $\pm 5\%$ can be reached with these screwdrivers. Statistically speaking, the error rate is less than 0.6 per one million screw assemblies.

DEPRAG SEQUENCE CONTROLLER AST5-S – compact size for torque up to 2 Nm

- highest precision for lowest torque ranges
- small size for confined spaces
- color touch screen with 4.3" TFT display
- torque control/angle monitoring
- angle control/torque monitoring
- friction-torque testing and friction-controlled fastening to torque
- 100 freely programmable sequence programs

The DEPRAG sequence controller AST5-S is the ideal controller for manual screw assemblies in combination with the tried and tested DEPRAG EC-Servo screwdrivers of the MINIMAT-EC-Servo (size 22) series within a torque range of 0.01 Nm – 2.0 Nm.

Operator friendly: The sequence controller is standard screwdriving programs for tightening to torque and loosening to angle. Parameters can be directly altered to suit screwdriving tasks using the touch screen. The AST5-S allows free programming of your manual screwdriving sequences for hand-held screwdriving tools. If required, further screwdriving programs can quickly and easily be set-up modifying the existing standard program.

High number of programs: The colour TFT touch screen allows fast access to and programming of up to 100 user defined screwdriving sequences.

Web browser based interface: Alternatively, to set parameters and access additional control functions, simply use any common web browser. Additional software is not required.

Small size: Due to its small size the controller is particularly suitable for use in manual work stations with confined spaces.

Storage, documentation and evaluation: The AST5-S records the screwdriving results for the last 7 production days. Additional features include the graphic display of screwdriving graphs, integrated PLC functions and comprehensive analysis options. A firmware update service and comprehensive software packages for screw joint analysis, documentation and process data collection are optionally available.
